

May's Honda Sales
And
**May's Trail Equipment and Leasing
L.L.C.**

Are proud to Present:

The SnowHogg

Do you want a snowblower that is designed with you the operator in mind? Do you want a snowblower that can be easily mounted on your ATV without purchasing extra mounting hardware, or costly self modification? Then we have the snowblower for you, and we call it the ***SnowHogg***.

The ***SnowHogg*** is a snowblower attachment for ATV's that performs as a High-Quality snow removal tool. It is sold exclusively by May's Honda Sales, and is assembled in the U.S.A. by May's Trail Equipment and Leasing L.L.C.

We bring together the best of two worlds with the ***SnowHogg***; a perfect mixture of power and performance, matched with years of unyielding quality.

The end result provides you with a machine that meets the demands of modern snow removal, along with easy operation, so you can get the job done.

To provide a quality product, you must start with quality service and parts. That is why we back our product with a two year warranty, and use genuine Honda Power Equipment parts. From the **13Hp** motor to our exclusive carriage assembly, you can be certain that the ***SnowHogg*** is built to provide you with years of dependability. Since we pre-assemble each unit, we guarantee that every new ***SnowHogg*** will be shipped pre-adjusted and ready to run.

The secret of a great snowblower is more than just size and horsepower; the secret is in the design. Start in the front, with the dual serrated ice augers that can literally "chew" into ice cutting it into just the right size for the powerful secondary fan. With distances thrown up to 90 feet with dry snow, and 45 feet with wet, its becoming clear where the ***SnowHogg*** gets its name!

But that's not all. Each auger not only has its own shear pin, but they each spin on grease-able, bearing supported shafts. This provides you with low maintenance, and years of dependability thanks to the easily accessible grease zerts, and double sealed bearings. It is the little touches like these that truly make the ***SnowHogg*** stand out as a true champion in the world of snow blowers. But let's face it the large cut with of **42 inches**, driven by a powerful 13 horsepower motor helps too.

To make the **SnowHogg** an even better deal, we have worked long and hard to provide you with mounting hardware that is not only strong, but durable. To accomplish this we use a specially designed Carriage system that supports most of the blowers weight on a pair of free spinning Skis. This Carriage system has a Push Tube that runs underneath the ATV, and attaches to a Tow Hitch in the rear. Built into the Carriage system is the Lifting Bar that is designed to be pulled down by a winch in order to raise and lower the blower housing. Two Sway chains are also attached to provide extra stability. All these components, with the exception of a winch, are included with each and every SnowHogg. Most importantly, this system allows the **SnowHogg** to be installed on any 4X4 ATV, regardless of brand, without frustrating self-modification.

In order to keep you safe when operating the **SnowHogg**, we made the control box adjustable, so it can be mounted within reach on the front rack of your

ATV. Not only does this control box have a large emergency kill switch, but it features a Safety tether as well. Without this tether attached the control box, the blower motor will not start. If the blower is running, and the tether is removed, the engine will instantly shut off, stopping all operation. This process provides the operator with peace of mind in the unfortunate case of an emergency.

Above all, we feel that you will find the *SnowHogg* not only a great snow blower, but a wonderful tool. That is why May's Honda Sales, is proud to provide such a fine product. In fact we are so proud that we would enjoy the opportunity to speak with you personally about it. Please feel free to call our toll free number listed below, or send us an email, our friendly sales staff is ready and willing to answer any questions that you might have. Our hours of operation are; Tuesday thru Friday 8:30 a.m. to 5:30 pm, Saturday 8:30 am to 2:00 pm, please note we are on Pacific Standard Time.
